

NOTICE TO THE TRADE

Low Sulfur Fuel Surcharge

October 16, 2014

Dear Valued Customer:

The Federal Clean Air Act contains a government mandate that all carriers are required to utilize fuel with a sulfur content of not more than 0.10% within the Emission Control Areas of North America.

Hybur Ltd is complying with this regulation and more importantly contributing by reducing emissions.

However, the use of Low Sulfur Fuel will significantly increase the carrier's operating expenses and Hybur Ltd will implement a Low Sulfur Fuel Surcharge to help mitigate the increase in cost.

This charge will be applied to all Northbound and Southbound, public and contract rates for Belize.

Low Sulfur Fuel Surcharge: **Effective Date: November 30, 2014**

Equipment	Amount
20'	\$ 60
40'	\$ 120
Passenger Vehicle N/E 700 CFT	\$ 29 each
LCL (40cft/2000lbs)	\$3.20 W/M, Min \$5.00
Bus/Units/Boats	120 each
Static Cargo/ Breakbulk	\$10 W/M Min \$150

For more information on how this will impact you please contact your traffic coordinator.

Thank you for your understanding and continued support.
